Herambiente acquires Waste Recycling

The company located in Castelfranco di Sotto (Pisa), with 20 years of experience in the industrial waste sector, is now part of the Hera Group

Herambiente, a Hera Group company and nationwide leader in waste treatment and recovery, has completed its acquisition of 100% of Waste Recycling Spa, including the subsidiaries Neweco Srl and Rew Trasporti Srl.

This was an important acquisition for both Herambiente and the entire multi-utility, that has now added a further segment to its operative area. Waste Recycling is a time-tested company that enjoys an advantageous position within an important industrial district, in the province of Pisa. It boasts an outstanding profile among Italian operators in the industry of special waste treatment and recovery. For over 20 years, Waste Recycling has in fact been active in gathering, storing, treating, disposing of and selecting special waste, both dangerous and non-dangerous, solid and liquid, in its two production centres located in via Malpasso and via Usciana in Castelfranco di Sotto (Pisa).

This acquisition is fully in line with Herambiente's rationale of development and its commercial strategies, that aim at using regional platforms to expand its presence into external territories. Thanks to this acquisition, in fact, Herambiente will become more competitive and oversee, in a more structured way, those segments of its clientele that are at present complementary.

In 2014, Waste Recycling treated roughly 370 thousand tonnes of special waste, of which 283 thousand tonnes of refluents, with a turnover of roughly € 32 million, 80% of which is concentrated within the region of Tuscany. It can count on approximately one hundred employees, 4 thousand contracts and 3 thousand active clients. It offers ad hoc services to large groups in the pharmaceutical, chemical and steel sectors as well, with commercial partnerships that are able to guarantee a greater degree of service coverage and continuity with its clients.
